## COMMENTAIRE DE GESTION

### ECONOMIE ET MARCHES

En janvier la FED a confirmé mettre en pause l'assouplissement monétaire en raison de la résilience de l'économie américaine et d'un mouvement de désinflation qui marque le pas. L'inflation core est ressortie légèrement en-deçà des attentes (3,2% en rythme annualisé) tandis que le PCE, la mesure d'inflation privilégiée de la Réserve Fédérale, est ressorti en ligne avec le consensus. Les investisseurs redoutent désormais que la FED maintienne ses taux d'intérêts à des niveaux élevés compte-tenu des craintes grandissantes sur l'inflation, exacerbées par les déclarations de D. Trump et la probable mise en place de tarifs douaniers contre le Mexique, le Canada et la Chine, en attendant l'Union Européenne... De son côté, la BCE a réduit ses taux de 25 bps à 2,75% sans grande surprise tant les perspectives de croissance demeurent mitigées alors que l'inflation se rapproche de l'objectif de 2%.

Le mois a également été marqué par l'investiture de Donald Trump en tant que 47ème président des Etats-Unis, dont la première action en tant que nouveau locataire de la Maison Blanche a été la signature d'un grand nombre de décrets sur des sujets divers comme l'immigration, le climat, les droits de douane et l'exploitation des énergies fossiles notamment. Enfin en Chine la croissance au T4 a été plus forte qu'attendue (+5,4%), poussant la croissance annuelle à 5%, en ligne avec les objectifs du gouvernement. Ce chiffre, à prendre avec des pincettes, marque les premiers effets des mesures de relance lancées en septembre. Les prix restent cependant sur une tendance déflationniste inquiétante.

Compte tenu des craintes d'accélération des prix aux Etats-Unis, les taux souverains américains se sont inscrits en nette hausse jusqu'à la publication rassurante de l'inflation américaine mi-janvier qui leur a permis de retomber à leur niveau initial (4,53% sur le 10 ans). Les taux européens ont suivi le mouvement par « sympathie » malgré des fondamentaux économiques qui ne le justifient pas. Côté crédit, les spreads se sont légèrement resserrés. Enfin, les marchés actions affichent des performances positives (+2,70% pour le S&P 500, +7,98% pour l'Euro Stoxx 50) malgré les remous créés par l'émergence de l'IA générative chinoise DeepSeek qui a fait trembler le secteur technologique en fin de mois. En revanche, la saison des résultats, lancée par les banques américaines, surprend positivement dans l'ensemble, de bon augure pour les publications européennes.

### GESTION

Le fonds gagne 2,22% en janvier porté principalement par le puissant rebond des actions européennes que nous avons renforcées à plus de 20% du fonds en fin d'année 2024 compte-tenu de leur retard et de leur valorisation attractive. Les actions américaines (5,5% du fonds) et chinoises (3,5%) ne sont pas en reste. Le crédit contribue également très favorablement à la faveur d'une relative stabilité des spreads de crédit et des taux.

The exposure figures represent revenue exposure to Sustainable Impact Solutions which reflects the extent to which company revenue is exposed to products and services that help solve the world's major social and environmental challenges. It is calculated as a weighted average, using portfolio weights and each issuer's percent of revenue generated from Sustainable Impact Solutions. To be eligible to contribute, an issuer must maintain minimum ESG standards.

## Summary

**ESG Quality Score** measures the ability of underlying holdings to manage key medium to long-term risks and opportunities arising from environmental, social, and governance factors. It is based on MSCI ESG Ratings and is measured on a scale of 0 to 10 (worst to best). The distribution of scores is based on the universe of funds included in MSCI ESG Fund Ratings.

**ESG Ratings Distribution** represents the percentage of a portfolio's market value coming from holdings classified as ESG Ratings Leaders (AAA and AA), Average (A, BBB, and BB), and Laggards (B and CCC).

**ESG Ratings Momentum** represents the percentage of a portfolio's market value coming from holdings that have had an ESG Ratings upgrade, and those with a downgrade, since their previous ESG Rating assessment.

**Carbon Risk** measures exposure to carbon intensive companies. It is based on MSCI CarbonMetrics, and is calculated as the portfolio weighted average of issuer carbon intensity. At the issuer level, Carbon Intensity is the ratio of annual scope 1 and 2 carbon emissions to annual revenue. Carbon Risk is categorized as Very Low (0 to <15), Low (15 to <70), Moderate (70 to <250), High (250 to <525), and Very High (>=525).

**Reputational Risk** represents the percentage of a portfolio's market value coming from holdings that are facing Very Severe ongoing controversies with the company's direct involvement. Controversies may be related to the environment, customers, human rights, labor rights or governance, in accordance with the MSCI ESG Controversies methodology. Portfolio level Reputational Risk is categorized as Very Low (0%), Low (>0% to <1%), Moderate (1% to <5%), High (5% to <10%), and Very High (>=10%).

**Governance Risk** represents the percentage of a portfolio's market value coming from holdings classified as Governance Leaders (global percentile of 76-100%), Average (26-75%), and Laggards (0-25%).

## Risk Exposure Metrics

Risk Exposure metrics provide transparency on select environmental and governance risks. They provide insight into potentially unknown exposures and unintended bets that may pose risk to investors.

### ENVIRONMENTAL RISK

**Weighted Average Carbon Intensity:** The Weighted Average Carbon Intensity measures a fund's exposure to carbon intensive companies. The figure is the sum of security weight (normalized for corporate positions only) multiplied by the security Carbon Intensity.

**Fossil Fuel Reserves (%)**: The percentage of portfolio's market value exposed to companies that own fossil fuel reserves.

**High Impact Fossil Fuel Reserves (%)**: The percentage of portfolio's market value exposed to companies that own high impact fossil fuel reserves. High impact fossil fuel reserves include Thermal Coal, Oil Sands, and Shale Oil and Shale Gas.

**Exposure to High Water Intensity Activities (%)**: The percentage of portfolio's market value exposed to companies with operations in lines of business that are typically highly water intensive.

**Exposure to High Water Risk (%)**: The percentage of portfolio's market value exposed to companies with a Water Stress Exposure Score > 6.6. Scores combine the geographic and business segment components and range from 0 to 10.

### GOVERNANCE

**Board Flag (%)**: The percentage of portfolio's market value exposed to companies ranking "below average" relative to global peers on MSCI's assessment of board structure and effectiveness.

**Lack of Independent Board Majority (%)**: The percentage of portfolio's market value exposed to companies lacking an independent board majority.

The following Board metrics represent the percentage of portfolio's market value exposed to companies with their respective board independence:

- **Board Independence (0-25%)**
- **Board Independence (25-50%)**
- **Board Independence (50-75%)**
- **Board Independence (75-100%)**

**No Female Directors (%)**: The percentage of portfolio's market value exposed to companies with no female directors.

**Female Represent 30% of Directors (%)**: The percentage of portfolio's market value exposed to companies where women comprise at least 30% of the board of directors.

**Entrenched Board (%)**: The percentage of portfolio's market value exposed to companies with long tenured or aging directors that suggest a problem with board entrenchment.

**Overboarding (%)**: The percentage of portfolio's market value exposed to companies with executive board members that serve on the boards of two or more additional public companies.

## Risk Exposure Metrics

Sustainable Impact measures revenue exposure to Sustainable Impact Solutions which reflects the extent to which company revenue is exposed to products and services that help solve the world's major social and environmental challenges. It is calculated as a weighted average, using portfolio weights and each issuer's percent of revenue generated from Sustainable Impact Solutions. Additionally, Sustainable Impact Solutions revenue from companies with negative externalities is excluded.

Negative externalities refer to Red or Orange flag ESG controversies, ESG Ratings of CCC and B, direct involvement in predatory lending, involvement in controversial weapons, more than 5% revenue from conventional weapons or firearms, and more than 10% revenue from alcohol or tobacco production.

All Information is impersonal and not tailored to the needs of any person, entity or group of persons.
- None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.
- It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, “Index Linked Investments”). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.
- Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.
- The Information may contain back tested data. Back tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.
- Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.
- Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on [www.msci.com](http://www.msci.com).
- MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.’s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.’s company filings on the Investor Relations section of [www.msci.com](http://www.msci.com).
